

FORK-TO-FARM AGENT-BASED SIMULATION TOOL AUGMENTING BIODIVERSITY IN THE AGRI-FOOD VALUE CHAIN

3rd Press Release

**BioValue Project Successfully
Completes 1st Review Meeting**

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the grant agreement number 101000499.

The BioValue Project has successfully completed its 1st review meeting which was held online on the 21st of June 2023.

We are glad to announce that BioValue's first review meeting with the European Commission's expert team was a success. This key milestone concludes the project's initial phase and demonstrates the extraordinary progress made across several work packages. In-depth discussions on agri-food value chains, innovative food development, pilot case studies, crop performance evaluation, simulation tools, and stakeholder engagement were held. During the meeting, the BioValue partners presented their extensive analysis of agri-food value chains and the development of novel food products, providing detailed insights into each work package. Pilot case studies and crop performance evaluations were used to demonstrate practical applications. Furthermore, the BioValue agent-based simulation tool, showcased our technology breakthroughs and their potential impact on the agri-food business.

Effective communication and engagement are critical components of BioValue's mission. The consortium presented how we actively reach out to stakeholders such as policymakers, industry professionals, and consumers through dissemination initiatives. We aspire to promote sustainable practices and innovative solutions in the agri-food sector by encouraging collaboration and dialogue.

The meeting allowed lively conversations on subjects such as biodiversity, food habits, consumer preferences, and agricultural challenges. We value the feedback from the project officer and reviewers since it will help determine BioValue's future path.

Inspired by the success of the first phase, we are excited and well prepared for an even more successful and effective second phase. We thank the European Commission for their support and remain committed to continuing our efforts to improve agrobiodiversity along the entire value chain. BioValue strives to have a positive and sustainable impact on the agri-food sector.
